

Versa Program

Versa Desks

Versa Natura

The Versa desk range is composed of three collections: Origins, Innova and Natura.

The Natura collection features a solid beechwood support.

Fixed height of 740 mm.

Black plastic leveller foot for 10 mm adjustment.

Work desks have a solid bridge support and beams are made of 7 mm thick steel.

The connector between the support and beams is made of 7 mm thick steel.

Meeting tables have separate legs joined to the steel frame.

Finishes: natural beech wood.

Versa Desks

Versa

Versa Innova

Versa Origins

Versa Natura

All three collections allow the customer to furnish the office according to their needs and tastes, with a wide range of possibilities.

Environmental Improvement

- Versa has been ecodesigned to ISO 14006 standards.
- The use of recycled materials is prioritized in product manufacture.
- Use of FSC/PEFC wood.
- Suppliers located near our facilities.
- Metal parts painted with epoxi-polyester paint.
- Over 99% of excess paint is collected and reused. The paint used contains no VOCs or heavy metals.
- Easily separable components for subsequent recycling.
- The glue used for edgebanding does not emit COVs.
- Optimized product volume and weight.

Structure

Each workstation has two 35x35x3 mm cold rolled steel beams attached to the crossbeams.

The modular structure avoids starter and extension beams.

Wire Management

Vertical wire management

Benches have optional steel covers for the intermediate supports to route wiring. Common wire management accessories are applicable to individual desks.

Wire management trough under desktop

Individual workstations have a single steel wire management trough attached to the beam.

For bench workstations, there is a double steel trough that can swing open for maintenance and cord rerouting.

Wire management

Sliding desktop

Versa comes standard with a smooth sliding desktop based on glides. Locking and unblocking position under the desktop.

The sliding desktop is not compatible with desk height pedestals. The 40mm frontal separation between desktops allows cords to pass to the desktop.

Desktop grommet

Made of plastic, Ø80 mm. Always placed at the side of the workstation.

Left side

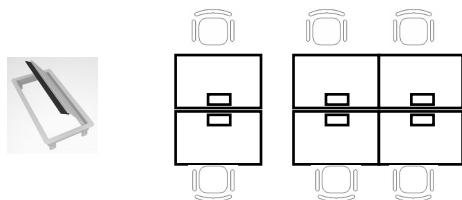

Right side

Top access without base

Steel and aluminum manufactured with strips. Receptades can be fixed directly to the wire management trough (ordered separately).

Top access can be only placed in frontal position.

Desktops

Materials

Working surfaces are available in:

- Laminate- faced 25 mm thick chipboard with 2 mm ABS edge banding.
- Wood veneer on 25 mm thick chipboard with natural wood edges.

Features

Easy, toolless desktop assembly and disassembly.

Desktop have 90° corners. In option, it is possible to have 40 mm radius corners in the following versions: inclined Origins supports, "A" Origins supports and Innova supports.

Desktops "hover" 5mm above the structure for a light and current look.

Versa Program

Versa Desks

Modesty Panel

Made of 1 mm gauge steel or 19 mm laminate- faced chipboard.

Modesty panel is attached to the desk structure with a 3 mm gauge steel connector, for easy assembly of the desktop.

Screens

Screens can be made of Metaglas (6 mm), translucid laminated glass (3+3 mm) or upholstered chipboard.

In all cases, corners have a 40 mm radius.

In case of individual desks, screens are fixed to the beam with a steel connector.

In case of bench, they are fixed to U's attached to the beams in double front workstations.

Accessory Rail

There are models with aluminum accessory rails for screen dividers and accessories.

It is elevated 32mm from the boards and has free space for wire management, hiding all receptacles, etc in the wire management trough.

The "mini" screens can be placed in either horizontal or vertical position. They are available in Rose, Lucía, Era, Sprint, Urban and Medley upholstery.

Storage

Trolley

The trolley is an individual storage element, designed for nomadic workers, for bags and for personal belongings.

It is made of steel.

With small accessort tray.

Pedestals and Cabinets

Versa program is compatible with Universal supporting pedestals and cabinets.

Sofa

Versa has its own sofa, 1600mm length, which matches bench width.

It has a wooden structure and polyurethane foam. Upholstery available in the Ofita soft seating range.

Available with optional Twist electrical receptacle.
