

XENON PROGRAM

Work table

The work surfaces are made in 25 mm thick particle board covered with Duriter and edged with 2 mm PVC.

Composed of supports made in extruded aluminium and frames under the board made in 40x20x1.5 mm rectangular steel tube.

There are four types of supports:

Rectangular meeting table

The work surfaces are made in 25 mm thick particle board covered with Duriter and edged with 2 mm PVC.

Composed of supports made in extruded aluminium and frames under the board made in 40x20x1.5 mm rectangular steel tube.

There are four types of supports:

CERTIFICATES

DIMENSIONS

L: 2000/A: 1000/Al.: 725
L: 1800/A: 1000/Al.: 725
L: 1600/A: 900/Al.: 725

FEATURES AND EQUIPMENT

Structure can be totally disassembled.
Supports equipped with levelling jacks.

ADVANTAGES

Customisation; the wide range of finishes and the possible combinations among them allow each office to be different and be a reflection of the company's corporate image.
Storage in small spaces; possible thanks to the fact that the structure can be completely disassembled.

SPACERS

SIMPLE

- 4+4 safety glass with polyvinyl butyral sheet.
- Colour: ice.
- Translucent 6mm Metaglas.
- Board clamps in injected aluminium.

OBJECT HOLDER

- Frame and horizontal support profiles in extruded aluminium.
- Point for fixing to table in injected aluminium.
- Dividing partition in Metaglas, laminate.
- Particle board coated in fabric, vinyl or extruded aluminium.

CERTIFICATES

XENON PROGRAM

Mapi

Single-block carcass in cold rolled
0.8 mm thick steel plate.

Facings in cold rolled 1 mm thick steel, natural
wood or 12 mm Duriter.

FEATURES AND EQUIPMENT

- Lock with replaceable cylinder and articulated unbreakable key.
- Guides on precision-milled steel balls greased for life.
- Load levels for storing hanging files or AZ type archive.
- The carcass can act as the support for the work surfaces.
- With hidden levellers.

OPTIONS

- Master key.
- Additional rod spacers.
- Tray and bracket for accessories.
- Upper multi-function shelf.
